IS 403 Project: Division of duties and schedule

1. Setup all the server-side and client-side files in the correct orientation in a directory
   - 11/8: Blake, Taylor, Ethan, and John will prepare this together, set up live share for other things
2. Link the Login page to a PostgreSQL database with all existing users
   - 11/12: Taylor and John
3. Link the Landing page to a PostgreSQL database with all existing resources
   - 11/12: Ethan and Blake
4. Allow for CRUD functionality with logins:
   - Create
   - Read
   - Update
   - Delete (we may decide we don't need this for users)
     i. 11/15: Taylor and John
5. Allow for CRUD functionality with resources available. Allow registered users to do this:
   - Create
   - Read
   - Update
   - Delete
     i. 11/15: Ethan and Blake
6. Find suicide prevention resources online to add a few to the database
   - 11/19: Taylor
7. Allow users to favorite and/or save their favorite resources
   - 11/19: Blake
8. Add all the resources to a database to allow for lookup of resources
   - 11/19: John
9. Link a few of the most helpful resources to our landing page, add other helpful links as necessary
   - 11/19: Ethan
10. Clean up and finalize website layout
    - 11/22: All

IS 403 Project: EJS Views

Landing page file- Resources available for everyone to view. Shown in index.ejs and the screenshots "Landing Page 1" and "Landing Page 2" in the submission. Utilizes the "assets" and "css" folders.

Login page file- Username and password entry in order to access features in the member landing page. Shown in login.ejs and the screenshot "Login Page."

Sign up page file- allow new users to create an account with a username, password, and other information. Not in this submission.

Member landing page file- add or delete resources to the list, customizable dashboard for resources for members. Not in this submission.
